

THUAN, DOAN TRAN

Software Engineer

(+84) 855 562 882 | dtthuan.contact@gmail.com | [linkedin.com/in/thuandtr](https://www.linkedin.com/in/thuandtr) | github.com/thuandtr

Software Engineer with a solid foundation in IT Operations and Software Developer, with hands-on experience operating and upgrading a large-scale Core Banking system at SACOMBANK (Core Banking on Red Hat OpenShift), alongside Web Development experience across multiple enterprise environments. Strong problem-solving mindset with proven ability to work on high-stakes systems that demand accuracy and stability

EDUCATION

International University, Vietnam National University – HCMC
Engineer, Information Technology

Oct 2020 – Jun 2025

EXPERIENCE

Saigon Treasure Commercial Joint Stock Bank (SACOMBANK) – IT Operation Specialist

Dec 2025 – **Present**

TechStack: Temenos T24, Temenos Payment Hub, InfoBasic, Java, OracleDB, RedHat OpenShift, Git

Team-size: 9+

- Configured complex system parameters and executed rigorous integration testing for the International Payment module, ensuring seamless deployment on the upgraded Temenos T24 R25 platform.
- Operated a transaction-intercepting fallback tool in the secondary environment throughout the downtime of the core banking upgrade from T24 R17 to T24 R25, accurately processing over 8 million FT (Fund Transfer) and ATM transaction records with zero disruption to Mobile/Internet Banking services.
- Directly contributed to the project that made SACOMBANK one of the first banks in Vietnam to successfully upgrade to T24 R25 on the containerized Red Hat OpenShift platform.
- Developed and upgraded system components in line with the new Temenos Payment Hub architecture requirements, including parameter setup, configuration, & integration testing.

Bosch Global Software Technologies (BGSV) – IT Operation Intern

Apr 2025 – Oct 2025

TechStack: ServiceNow, ITSM, OracleDB

Team-size: 9+

- Handled end-user support tickets (L2) following ITIL processes, ensuring compliance with defined SLA/KPI targets via ServiceNow and ITSM.
- Participated in problem investigation and change management processes; performed database administration and optimization using Oracle PL/SQL.
- Supported the rollout of new features and hot-fixes; maintained and monitored application servers to ensure stable system performance.

AQTech (AnhQuan) — Web Application Developer – Freelance

Apr 2025 – **Present**

TechStack: PHP, WordPress, JavaScript, CSS3, HTML5

Team-size: 5

- Designed and implemented responsive landing pages applying advanced UX principles, optimizing the experience across all devices and improving conversion rates.
- Optimized a custom WordPress theme through asset minification, lazy loading, and caching strategies, reducing page load times by 40% and enhancing overall user experience.
- Built custom WordPress plugins that automated repetitive business processes, saving clients several hours per week and freeing teams to focus on higher-value tasks.

DotB — Web Application Developer Intern

Apr 2023 – March 2024

TechStack: PHP, WordPress, JavaScript, MySQL, SugarCRM API, HTML5/CSS3, Git, MySQL

Team-size: 9+

- Improved system performance through code refactoring and database query optimization across multiple client websites.
- Developed a custom SugarCRM integration API enabling seamless data flow between the CRM system and WordPress platform.
- Built client websites from scratch using PHP/WordPress, exceeding performance benchmarks and client expectations; implemented automated backup and update systems that reduced maintenance costs.
- Collaborated with design and marketing teams to deliver cohesive digital solutions for clients in the education sector
